USER GUIDE

Setup and Features Information

- A. Press and hold the **Power On/Off** button beside the keyboard to power on the unit
- B. To save power of battery. Press the **Power On/Off** button or (**sleep**) button to turn off the screen. Press it again to turn the unit on.
- C. To power off the device, press and **hold** the Power On/Off button until the sub-setting menu appears on the screen. Move the cursor to the **Power off button** and then click the **left button**. "**Power off**" menu will appear, move the cursor to "OK" button then left click it.

Notes:

Like your computer, after turning on the Device, you may have to wait a short while to let the operating system boot up before the home page appears on the screen.

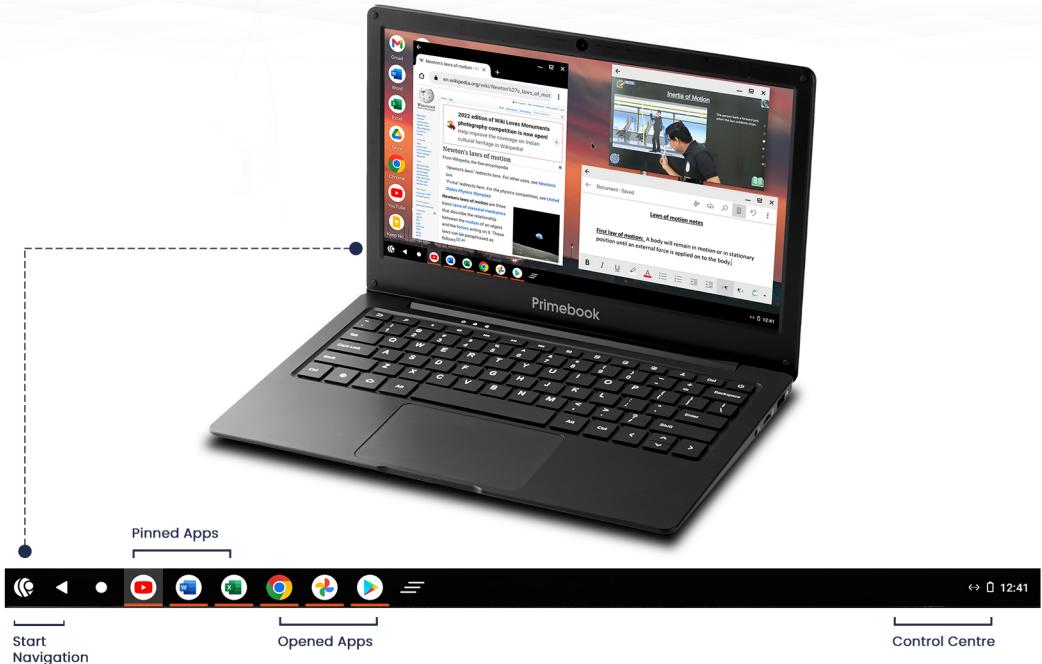

Hard Reboot - Long press power key for 10 sec

Hard reset - Power off laptop and hold **ctrl + tab + power**, system will boot into recovery mode now, select factory reset here

Stay fresh and update the PrimeOS by following below mentioned steps

- Go to settings
- Click on "**About device**" option
- Click on "**Status**"
- Click on "**Check for updates now**", if system is up to date then it will notify you that "**Your system is up to date**" or else it will ask you to install the updates.

Keymapping

Map any touch input to keyboard keys and trackpad click

- Open the desired android app
- Double Tap Right Ctrl to open keymapping tool
- Add button and place it over the desired location
- Assign any keyboard key or trackpad click by tapping on the key or click
- Repeat the process to assign multiple keys
- Exit the keymapping tool (all of your assignment will be saved automatically)

Notes:

In case you want to type while using the keymapping tool, just turn off the keymapping feature by Double Tap Right Alt. You can turn back on the keymapping feature by Double Tap Right Alt once you are done with typing the required content.

Extra Space for other details If required
